EDUCATION

Swarthmore College, Swarthmore, PA **MAY 2023**
B.A. in Mathematics (Emphasis in Statistics) and Computer Science

TECHNICAL SKILLS

Languages: R, Python, SQL, Databricks, Git, Slack, Atlassian Confluence

EXPERIENCE

Cincinnati Reds, Cincinnati, OH **JAN 2023 - PRESENT**
Senior Hitting Analyst, Player Development **NOV 2025 - PRESENT**

- Utilize statistical methods and algorithms to design and implement a system that detects significant changes in a player's swing decisions, contact skills, and quality contact throughout the season and sends daily notifications to analysts.
- Identify and contribute strengths and goals for 75 individual mid-season and off-season player plans.
- Continue to lead bi-weekly Player Development Hitting Analytics meetings.
- Coordinate projects between Player Development, Baseball Analytics, and Sports Science.
- Lead Baseball Operations Trainees through the completion of their individual development projects. This includes helping them design a project outline, scheduling bi-weekly meetings to discuss their progress, reviewing their code, and presenting the completed work to Player Development Staff.
- Continue traveling to affiliates (Rookie Ball through Triple-A) throughout the season.

Hitting Analyst, Player Development **NOV 2023 - NOV 2025**

- Built the foundation of Player Development Hitting Analytics for the organization. This included researching and establishing the core KPIs for the Hitting Department, along with developing weekly and monthly reports.
- Designed and implemented weekly and monthly reports to track player progress according to the organization's KPIs.
- Led bi-weekly Player Development Hitting Analytics meetings to create a space for Player Development, Analytics, and Sports Science to discuss current projects, next steps, and future goals.
- Traveled to each affiliate one or two times a season to provide and discuss notes on player performance, meet with coaches to walk through development plans, and communicate with players about the organization's KPIs.
- Conducted ad-hoc research projects based on the needs of Player Development.

Trainee, Baseball Analytics **JAN 2023 - NOV 2023**

- Built three new statistical models for catcher framing, blocking, and throwing.
- Developed comprehensive catcher postgame reports utilized across all levels of the organization.
- Conducted ad-hoc research projects when requested by Baseball Operations or Player Development staff.

Research Assistant, Carnegie Mellon University, Online **JUN 2021 - SEPT 2021**

- Selected as part of 15 person cohort for summer undergrad research focusing on sports analytics
- Topics included: Data Visualization, Linear Regression, Generalized Linear Models, Penalized Regression, Principal Component Analysis, Generalized Additive Models, and more
- Main Project: Maximizing wOBA with Launch Angle and Exit Velocity
    - Project Link: https://github.com/brooke-coneeny/CMSAcamp_baseball_project/tree/main
    - The project was advised by Adam Brodie, current Assistant Director of Research with the Houston Astros.

Data Quality & Reporting Intern, USA Baseball, Cary, NC **MAY 2022 - AUG 2022**

- Queried databases and extracted data from various systems.
- Generated and distributed personalize player reports for athletes that participated in the PDP.
- Aggregated, organized and analyzed athlete performance data collected at PDP events.

Assistant Softball Coach, NJ Cheetahs 14u McGowan, Central Jersey **SEPT 2020 – SEPT 2021**

- Instructed the players on fielding, hitting, pitching and catching techniques
- Mentored the players in being leaders on and off the field in order to prepare them for college
